Meet the New Crew

UC2013 has come and gone, and we at TMA are hard at work turning your ideas and suggestions into the next generation of maintenance management solutions. We hope the event provided those participating with the training and networking opportunities necessary to get their organizations to a higher level. If you weren't able to take part in this year's Conference, put next year's on your calendar April 15th - 17th, 2014.

In addition, throughout the year the Client Relations team provides a variety of world-class online educational events for both TMA Desktop and WebTMA users. Take

advantage of the opportunity to expand your knowledge of TMA products.

Product Spotlight

Universal Procurement Integration Module

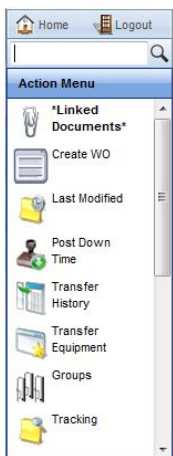

The Universal Procurement Integration (UPI) module is used to transfer the procurement information held in WebTMA's Materials Management module between WebTMA and your financial Enterprise Resource Planning application (ERP). Since WebTMA may not be your organization's primary purchasing software, many times work is duplicated between a material purchase in WebTMA and your primary procurement system.

UPI keeps your WebTMA and ERP databases updated in near real-time (data is polled at one minute intervals). The module has the following functions:

- Export Purchase Requisitions and Receivings from WebTMA to the ERP
- Import Vendor information and Purchase Orders from the ERP to WebTMA

For more information on Universal Procurement Integration module or any other TMA Product, contact sales@tmasystems.com or visit www.tmasystems.com.

TMA Tech Tips

Fast Find Field

To save time and help you work more efficiently in WebTMA 5.0.7, there is a new feature called "Fast Find". The new "Fast Find" feature can be found on every window above the "Action Menu". If you are looking for a record, just key the value in the "Fast Find" field and hit enter or simply click the magnifying glass. WebTMA will then load the exact match or present a list for all matches of the record you entered in the "Fast Find" field.

TMA Training

TMA offers free monthly training videos for TMA Desktop and WebTMA users. To view the videos, visit our TMA Support website at tmasystems.net.

WebTMA

June - Setup Considerations - Best Practices

Proper setup of your CMMS solution is the key to successful use within your organization. In this video, we will detail best practices discovered over decades from implementations and troubleshooting. Our trainer will discuss database structure, efficient workflow, effective training practices and TMA resources.

July - [iServiceDesk Management](#)

iServiceDesk provides your maintenance organization with the ability to process work orders quickly and efficiently. At any time, end users can request repair work, generate real-time status reports, and access facility news, emergency procedures or links to other sites. This video will review the management and customization of this very useful tool.

TMA Desktop Updates

Client Server Maintenance Releases
Release Version 8.1.2.7 for Version 8.1

Non-Client Server Maintenance Release
Release Version 8.1.2.7 for non-client server

Meet the New Crew

Karen Kimmel - Karen joined our team in the spring as our Receptionist. Originally from San Francisco Bay Area, Karen worked as an executive assistant for Fortune 500 corporate officers in the high-tech industry. She also spent eight years in the USAF as a Photo Intelligence Interpreter. Karen is a working artist that enjoys the culture of Tulsa like the Philbrook and Gilcrease art museums.

Stan Hunter - With sixteen years of experience in IT and training, Stan is beginning his career at TMA in Client Support and then moving into Professional Services. He is from South Florida and is busy raising his two young boys. In the past, Stan spent his free time singing in several bands but today enjoys spending it writing. He looks forward to many years here at TMA.
