

## FIRST QUARTER 2022 NEWSLETTER

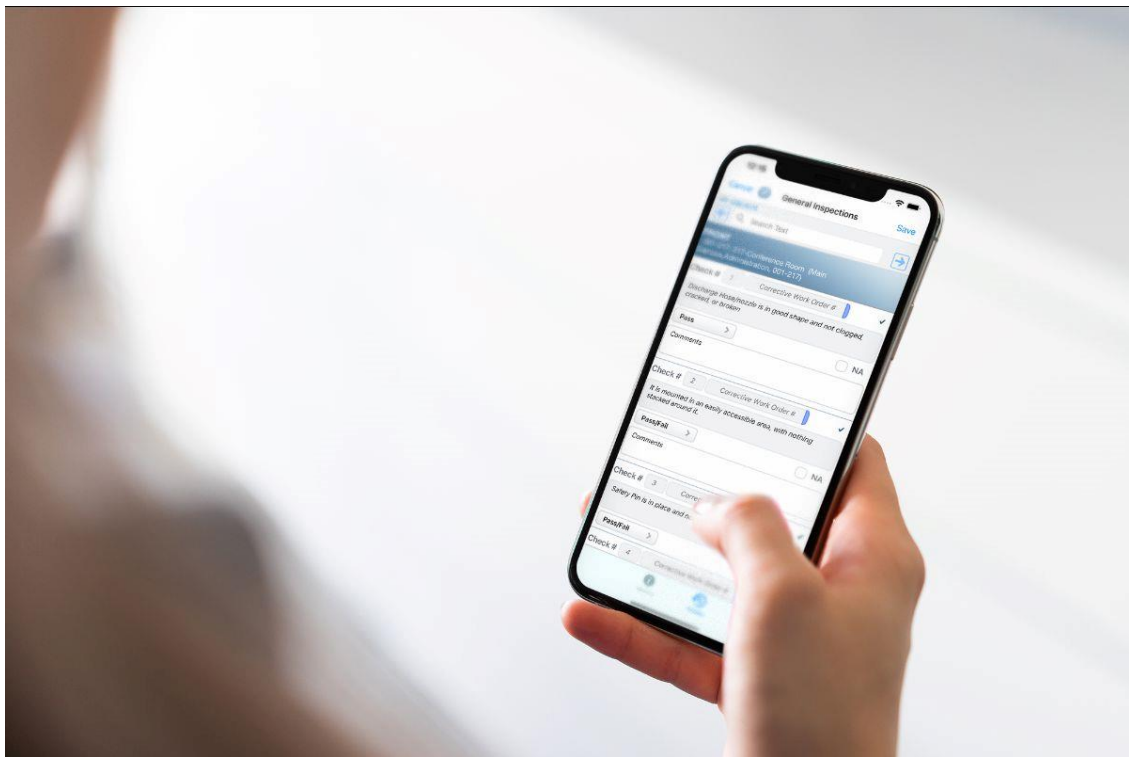

### TMA News

#### 2022 □ A Bright Future

2022 marks a year of exciting change for TMA Systems. We look forward to further advancement of our offerings, continued internal growth and meaningful collaboration with you and your organizations.

We welcome [Mark Simner](#) as our new Chief Executive Officer. Our team looks forward to his deep knowledge of SaaS product development and operational logistics.

Eager to roll up our sleeves, we anticipate a year of unparalleled progress that will pave the way to continue providing top-tier products and services to keep your team and greater organization running smoothly.

## Product Spotlight

### General Inspections

*Looking to streamline your organization's inspection process?*

[TMA's General Inspections module](#) will help you do just that.

Module overview:

1. Give your technicians a global checklist for inspections of assigned assets and areas.
2. Ensure that each check is reviewed and completed in sequence.
3. Document results. These checklist results can record a value reading, pass/fail status, and other ratings.

Features & Benefits:

- Automatically generate a work order for a failed inspection point
- Review actual and potential hazards that require immediate attention
- Retain inspection history for future reference
- Collect data for predictive maintenance analysis
- Use the PM scheduling function to automatically generate inspections on a defined basis

*Go mobile!*

Eliminate paper inspection forms by having your technicians use WebTMA GO or mobileTMA GO to electronically complete inspections and upload results for analysis. (If mobiles are not in your current plan, Technician Logins also allow your inspectors to complete the General Inspections.)

Please reach out to your TMA Account Executive to discuss your needs and schedule a demo to answer specific questions.

## WebTMA Training Videos

The logo for WebTMA 7 Batch PM Update. It features a blue grid icon to the left of the text 'WebTMA 7' in a bold, sans-serif font. Below this, the text 'Batch PM Update' is written in a smaller, regular font.

WebTMA 7  
Batch PM Update

[WebTMA 7 – Batch PM Update](#)

This tool allows for mass data updates to selected fields that deal with Preventive Maintenance Schedules. Using the Batch PM Update, you can deactivate schedules, update technicians assigned to PM Work Orders, change due dates, allotted time to complete Work Orders, priorities and more. This video will help identify the fields that will need to be updated and provide the roadmap to efficient PM data management.

### [WebTMA 7 – Batch Validation](#)

The work request process of facility maintenance should not be complicated. Using Batch Validation with Service Requests will allow your users to be able to efficiently handle work requests in a timely manner. This tool can be set up with data entry customizations minimizing time between requests and getting the work into the hands of those completing the tasks.

### [WebTMA 7 – WO Browse](#)

The Work Order Browse is a multi-dimensional tool used to assist in day to day search queries and help user roles process their work load. For example, this tool enables a supervisor to quickly find work orders finished by technicians on mobile devices and close those out from one screen. This video is packed with tips and tricks, that will help save time and cost related to the digital processing of CMMS tasks.

## Our New Team Members.

We are pleased to welcome more top industry professionals to TMA. These new team members will continue to provide you with the resources and services that have been the pillar of our business for over two decades.

### **Greg Shell**

VP of Operations

"I have the pleasure of leading our incredible client facing team members. Although I am new to TMA, I have spent almost 30 years helping companies transform their business through technology. I look forward to meeting you, our clients, and learning about what makes TMA Systems great and areas we can improve. We have some exciting initiatives underway. Stay tuned!"

**Todd Miltenberger**

VP of Finance and Corporate  
Development

"I'm thrilled to join the TMA Systems team. I've spent the majority of my career at companies that were transforming to the next level and I'm excited about the future we are building here."

**Ted Willing**

Manager of Professional Services

"Wow, now I'm on the other side! As a client for 15 years and using the application for so long, it was the natural choice to come to work for TMA Systems once I left the Architect of the Capitol. I see changes happening all the time, and I've only been here two months. I look forward to being a part of the changes and providing input from the client and facilities perspective."

**Habtamu Gemechu**

Senior DBA

"I am very excited to be part of the team. I have been in the technology industry for most of my career, specifically in database administration. I look forward to being a part of the Azure Microsoft cloud implementation. I believe will be a great solution for TMA's current and future customers."
